

# Open the door to a new smile.

## Advantages of composite treatment

Composites are tooth-colored filling materials dentists can use to make repairs or esthetic changes to your teeth. These composite materials are:

### Beautiful

Get glossy, natural-looking results that blend into your smile.

### Conservative

Minimal natural tooth reduction while reshaping your smile.

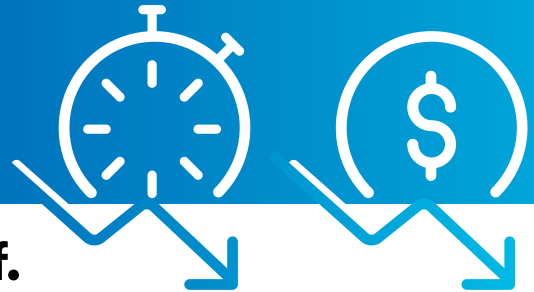

### Strong

Enjoy long-lasting results that are worth smiling about.

**3M™ Filtek™ Dental Composites have been trusted in over 1 billion restorations worldwide.\***
