

Turn stress into success: Reclaim your radiology worklist

Artificial intelligence (AI) is not a replacement for radiologists. It is a dependable tool for assisting with the lifesaving work of accurately detecting, diagnosing, documenting and monitoring disease in today's reading rooms.

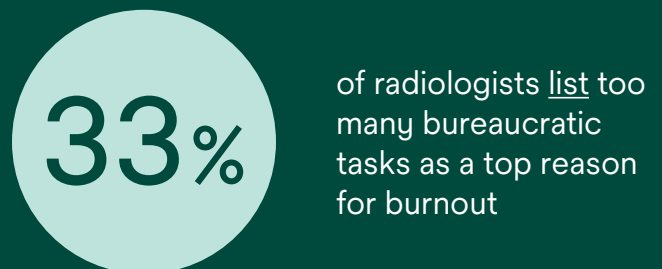

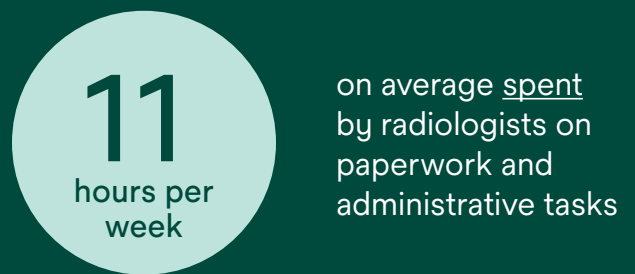

In the face of widespread burnout and high patient volumes, AI-powered radiology solutions can help increase efficiency and trim worklists.

Top challenges for radiologists: A scan of the industry

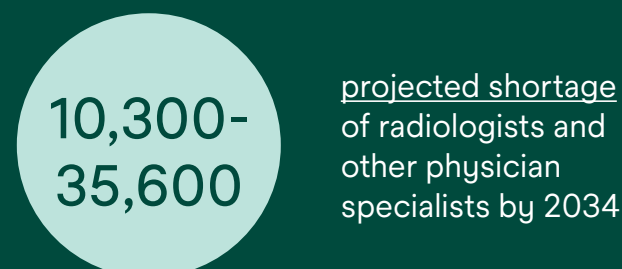

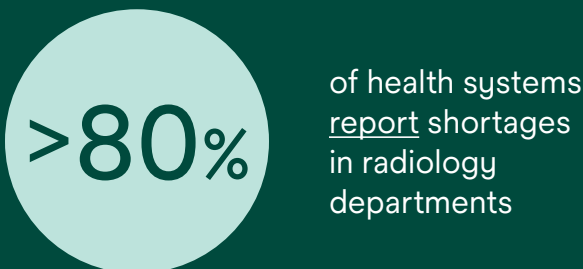

Rising stress

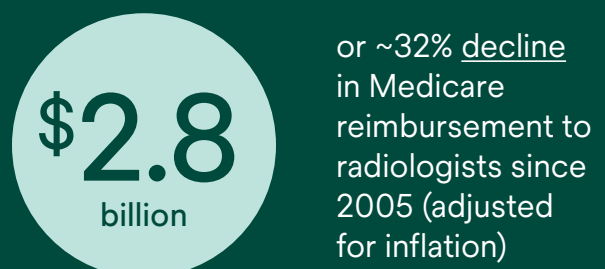

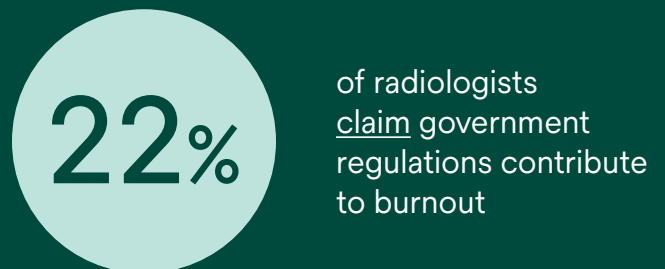

Administrative burden

Limited resources

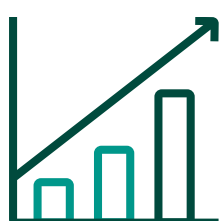

Ever-changing regulations

Streamline your radiology workflows

By bringing together advanced speech recognition and AI-powered technology, Solventum™ Fluency™ for Imaging enables radiologists to create higher quality diagnostic interpretations more easily and quickly.

Maximize productivity and efficiency

Produce accurate and quality-driven reports with built-in computer-assisted physician documentation (CAPD) technology that delivers real time, automated clinical insights directly in the reporting workflow.

Boost clinical confidence

Enhance clinical report quality and patient care with AI-powered insights and natural language understanding (NLU) that provide contextual understanding of what is being dictated and improve accuracy over time.

Reduce rework and automate tedious tasks

Optimize workflows using standardized reporting templates and personalized macros that help ensure complete and compliant information is captured — allowing for easier and faster report creation.

Trust top ranking technology

Solventum Fluency for Imaging ranked #1 in the Best in KLAS report for Speech Recognition: Front-End Imaging for 2024, 2023, 2022 and 2020.
