

3M™ Data-to-Action (DTA)

- Delivers purpose-driven content to address population health and payment challenges for health care payers and providers
- 3M DTA is enriched with 3M patient classification methodologies and proprietary value-added enhancements
- Provides data extract files your organization can merge with additional sources into your data warehouse for more powerful insights

From data to insights, easier and faster

The 3M DTA was created to help your organization get the most out of their 3M content. One data feed returns grouped data across multiple methodologies and value-added data enrichments, allowing for fast and efficient data to provide deliverables within days after data receipt. No software installation or separate system configurations are needed to access 3M methodologies.

3M is an industry leader with more than 40 years of expertise in developing and maintaining clinical categorical classification tools for government and commercial value-based care, payment and quality programs.

Established methodologies meet rapid data delivery

3M patient classification methodologies help health care payers and providers understand the value of population health and patient care by providing insights into patient mix, expected reimbursement and quality outcomes. Rapid data delivery empowers your organization to act sooner to drive change.

With 3M DTA, you can:

- Eliminate the installation – Data is sent via a secure data transfer method
- Quickly onboard data with standardized business rules and limited data specification decisions
- Reduce data transfer turnaround time, allowing for quick access to actionable data
- Address data issues faster with easy to understand data quality reports
- Access helpful documentation through the 3M customer support site
- Merge output with other data sources for more robust data insight capabilities

3M DTA delivers content from multiple 3M patient classification methodologies:

3M™ All Patient Refined DRGs (APR DRGs), 3M™ Enhanced Ambulatory Patient Grouping (EAPGs), 3M™ Clinical Risk Grouping (CRGs), 3M™ Potentially Preventable Complications (PPCs), 3M™ Potentially Preventable Readmissions (PPRs), 3M™ Patient-focused Episodes (PFEs), and 3M™ Population-focused Preventables (PFPs) including Potentially Preventable Admissions (PPA), 3M™ Potentially Preventable Visits (PPVs), and 3M™ Potentially Preventable Services (PPS), and 3M™ Ambulatory Potentially Preventable Complications (AM-PPCs)

3M™ Data to Action (DTA)

3M DTA data extracts offered based on client needs:

- Population health
- Facility quality and payment
- Episodic care

Proprietary value-added enhancements included in selected data extracts

- Cost analysis (inpatient and outpatient)
- Pricing (Medicare)
- Attribution (primary care physician, specialist and facility)

Data-to-action — expedite, integrate, leverage and evaluate:

- **Expedite** the implementation of 3M groupers (3M CRGs, 3M PFPs, 3M PFEs, 3M PPRs, 3M PPCs, 3M APR DRGs, 3M EAPGs and 3M AM-PPCs). Submit a single data feed and receive grouper and claims output for up to eight groupers
- **Integrate** 3M grouper output into existing data warehouse and combine with other data sources such as Healthcare Effectiveness Data and Information Set (HEDIS) or hierarchical condition categories (HCCs)
- **Leverage** data in the design of value-based programs by including 3M CRGs and potentially preventable event methodologies (3M PFPs, 3M PPRs, 3M PPCs)
- **Evaluate** hospitals and outpatient clinics using 3M APR DRGs for inpatient care and 3M EAPGs for outpatient care. Utilize data to analyze payment variation and profitability to inform provider contracting
