

3M™ SoluPrep™ S Sterile Antiseptic Solution
chlorhexidine gluconate (2% w/v) and isopropyl alcohol (70% v/v)
Patient Preoperative Skin Preparation

How might a greater coverage area help reduce costs?

The following results were calculated by the 3M Budget Impact Calculator, based on health economic modeling and published information.¹⁻³

In a calculated scenario with 5,000 procedures,¹ the use of SoluPrep S Sterile Antiseptic Solution 26 mL with a greater coverage area suggests*:

4,636

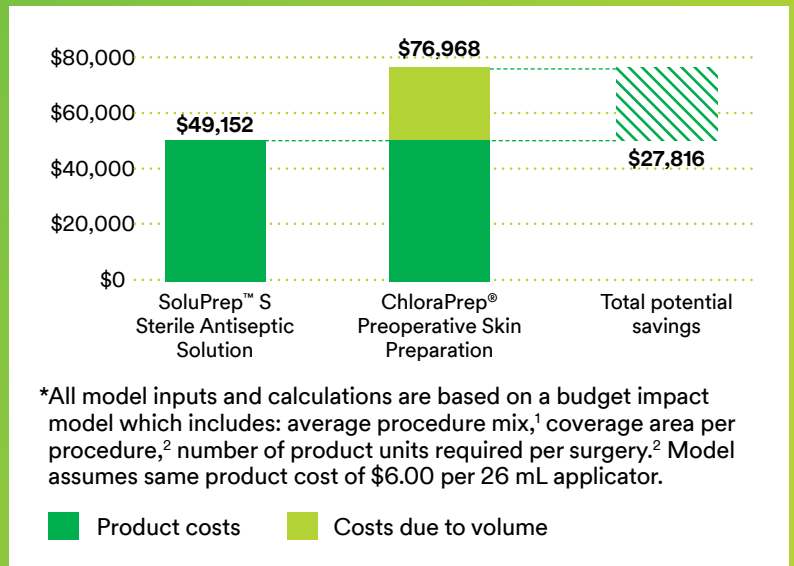

fewer 26 mL applicators
required than Chloraprep®
preoperative skin preparation

\$27,816

potential savings

36.1%

potential total cost reduction

Let us help you calculate your potential customized savings

This is an illustration and not a guarantee of actual individual costs, savings or outcomes. The results calculated by the 3M Budget Impact Calculator are based on health economic modeling and on information provided by scientific studies and published information. It gives suggestions about budgetary relationships for the purpose of optimization. The calculations are conducted with reasonable care, using the instruments/parameters specified in the references. 3M shall not be liable for the results of the calculations and these results shall be seen as an indication only of the potential cost, savings and outcomes based on the information given and is in no way binding. Other factors, which might also have an influence on the results, may have not been taken into account.
