

Carbon Reduction Plan

Supplier name: KCI Medical Limited

Publication date: May 2024

Commitment to achieving Net Zero

KCI Medical Limited, a wholly owned subsidiary of Solventum Corporation, is committed to achieving Net Zero emissions in its UK operations by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

On 1 April 2024 the 3M group spun off its Health Care business, resulting in two world-class public companies well positioned to pursue their respective growth and sustainability plans. The new Health Care company, Solventum, is a leading global diversified healthcare technology company focused on wound care, health information management, dental care, and biopharma filtration. Solventum, including its subsidiary in the UK, KCI Medical Limited, is committed to maintaining the highest standards of ethics, compliance and sustainability in our business practices.

In accordance with the Carbon Reduction Plan requirements, the management team of KCI Medical Limited is committed to achieving net zero emissions by 2050. To establish a solid foundation for achieving its Net Zero emissions objectives, KCI Medical Limited will receive environmental metrics data sets from 3M after third party assurances in July 2024. These data sets will form the KCI Medical Limited baseline for environmental metrics and goal setting, following which KCI Medical Limited will issue a robust updated Carbon Reduction Plan.

Baseline Year: TBC	
Additional Details relating to the Baseline Emissions calculations.	
KCI Medical Limited expects to receive third party assured environmental metrics data from 3M group in July 2024. This data will be the basis for setting the baseline year emissions and finalising goals for KCI Medical Limited.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)

Scope 1	TBC
Scope 2	TBC
Scope 3 (Included Sources)	TBC
Total Emissions	TBC

Current Emissions Reporting

Reporting Year: TBC	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	TBC
Scope 2	TBC
Scope 3 (Included Sources)	TBC
Total Emissions	TBC

Emissions reduction targets and Carbon Reduction Projects

As a newly established company, we are currently in the process of gathering our emissions data, which will form the basis of our future decarbonisation plans. From 2025, the Solventum group (including KCI Medical Limited) will commence the issuance of reports under its own name. This initiative is in strict compliance with legal and regulatory requirements and with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard. Our commitment to transparency and adherence to these standards underscores our dedication to maintaining the highest level of corporate governance.

Furthermore, we will share carbon reduction projects, including our overall roadmap to achieving net-zero emissions 2050, after we receive third-party assured data from 3M group. We anticipate this data to be available in July 2024.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
